Hock Wrap and Coffin Bone Wrap with Power Unit

E-stim/Micro Electrodes

LED Lights (in Red)

IR Lights (white or clear)

Pulse Magnetic Inductors

The new Equine Pro Kit by Xanacare, designed to promote total horse care.

Designed to repair and maintain the horses hoof. Hoof injuries are the most common and debilitating equine injuries. Until now there has never been a therapy product specifically designed to treat these issues, now there is.

The new OTH pad can be used to reduce swelling in the flexor and/or extensor tendons, promote growth in the hoof wall and increase blood flow to the inside of the hoof and live sole. The combined therapies of the OTH pad promote a healthy hoof, reduce navicular and coffin bone pain and enhance bone health and density.

Should be used to prevent or heal:

- Navicular Pain
- Laminitis
- Founder
- Deep Digital Flexor Swelling or Pain
- Irregular Hoof Growth
- Quarter Cracks

The OTH Therapy Pad does not have vibratory massage.

The Hoof Plate does not have vibratory massage or E-stim/Micro Electrodes.

*“The **MTS-7** unit reduces muscle tightness, increases blood flow and increases cellular activity. These functions intern decrease swelling, improve healing, relax muscles that restore proper joint functions and undue stress placed on joints, ligaments and tendons. This unit and pads are great for promoting healing do to an injury or from surgery, reducing scar tissue and adhesions as well as proud flesh”.*

Dr. Dave Barton D.C.
Equine Chiropractor and Therapist

The **MTS-7** unit can be used in the field (battery powered) or in the barn while plugged in for continual use.
