

Committed to Excellence

For the last several decades health care professionals have found remarkable success using light, electrical stimulation, and magnetic therapies individually in their treatments.

SimulCare is a combined, simultaneous therapy system that is revolutionary in the health care industry.

Large Pad

Revolutionary Five-in-One Therapy

Combined • Simultaneous • Therapy

FDA cleared

LED Red Lights

LED red light is considered a Photo-bio-stimulation modality used to increase local blood circulation. It can provide a soothing, relaxing and pain relief effect. It is used to treat injuries in soft tissue areas as well as systematic trigger points.

LED Infrared (deep thermal effect)

LED infrared light therapy is a low-level light from below the red spectrum. It couples the positive effects of red light with the added benefits of topical heating to increase local blood circulation and provide relaxation of muscle tissue.

E-stim/Micro Current

SimulCare produces either a variable low/high E-stim or micro current simultaneously with all of the other modalities. This unit produces alternating and direct current in a biphasic/bipolar mode. The stimulating effect of the micro/E-stim current enhances the overall effectiveness of the other therapies in the SimulCare. It can provide symptomatic relief of post-surgical or post-traumatic acute pain.

Vibratory Massage

Three levels of vibratory massage therapy are available. Vibratory massage promotes muscle relaxation and increased blood flow, and relieves minor aches and pains.

Permanent Magnetic Therapy

SimulCare provides a permanent magnetic field. Increases the flow of oxygen and blood to the injured area, stimulating the removal of cellular wastes.

**U S Patent No.
7,503,927**

Other Patents Pending

SimulCare is effective in treating the following conditions:

- **Inflammation**
- **Pain control**
- **Increased blood flow and oxygen levels**
- **Temporary relief of minor muscle and joint pain**
- **Promotes the relaxation of muscle tissue**
- **Temporarily increases local blood circulation**
- **Management of chronic intractable pain**
- **Adjunctive relief of post-surgical or post traumatic acute pain**

Al Wilson

Dr. Vetanze introduced me to the SimulCare 3 years ago and I have used it ever since. “The thing is MAGIC!” I love it and use it regularly and also travel with it. Thanks Dr. V.

— Denver Bronco “Retired”
Rod Smith

The SimulCare unit is the most effective, time efficient therapeutic tool I've used in 25 years of clinical practice. The versatility built into it is amazing. To be able to address muscle spasms, strains, sprains, acute traumas/injuries, and chronic conditions with such ease and simplicity is invaluable for any therapist. The fact that it's small, handy to use and can be recharged easily makes it a must for all therapists, trainers and doctors working in a clinical setting as well as in the field.

The SimulCare unit reduces inflammation and pain significantly making it possible to apply manual therapies to injuries and areas of chronic pain. The relief that the client feels gives them hope they'll be ready to go sooner than later. Clients report being excited to have a tool they can use to recover quickly and use on their own time.
